Lobbying & The National Defense Authorization Act: How to Influence Defense Spending to Protect Human Rights | Alder Auditorium

The National Defense Authorization Act (NDAA) is the major piece of legislation passed by Congress every year that funds the Department of Defense and its activities. For 2020, Congress has agreed in the NDAA to authorize \$733 billion for military spending around the world. Because it's such an important bill, Congress passes it every year, offering activists opportunities to try to influence what the military spends its money on, including things that affect human rights. In 2020, for example, Amnesty International lobbied Congress to include provisions in the bill that would require it to improve its investigations and compensation of civilian casualties caused by US military actions, help prevent civilian harm, and prevent the transfer of any more prisoners to the detention center at Guantanamo Bay. This session will explain what the NDAA is, how it gets drafted and passed, and how to lobby representatives in Congress to influence what the US military is actually doing.

The Endless US “War on Terror” – its costs, its impact, and how to help stop it | Alder 105

The United States has been at war for more than 18 years – ever since the September 11, 2001 attacks on New York and Washington, DC. Many Americans pay little attention to this ongoing & expanding armed conflict around the world, because that war isn't happening on US soil. But it does involve US servicemembers, and the US government has killed hundreds of thousands of civilians around the world in our name, spending nearly \$6 trillion in the process. It's also tortured detainees, and continues to detain 40 men indefinitely on an offshore U.S. military base in Cuba, most without charge or trial. Meanwhile, the threat from non-state armed groups has only grown and spread to more countries. This discussion will summarize the status of the US military's so-called “Global War on Terror,” will explain the human rights violations it has caused, and will brainstorm ideas for how to create a groundswell of opposition to this endless war that will influence the US government – including Congress, the Trump administration, and our next president, whoever that may be.
