

State and local governments have increased attacks against transgender people, often targeting the lives and welfare of children. In addition to cruel legislation, politicians continue to increase vicious rhetoric, putting real people at risk as threats and rates of violence against transgender people continue to increase.

**I urge you to support the Transgender Bill of Rights resolution** (H.Res.269/S.R.144) which sets out a comprehensive framework for protecting the rights of transgender and nonbinary people. The resolution urges action to:

- Ensure transgender and nonbinary people have equal access to services and public accommodations
- Recognize the right to bodily autonomy and ethical healthcare
- Promote the safety of trans and nonbinary people
- Enforce the civil rights of transgender people.
